

Evolution du Codage ICD-9, ICD-10 de la Classification Internationale des Troubles du Sommeil

Présentation des résultats de la Task Force de l'AASM

Cugy D, Paty J. – Clinique du Sommeil CHU-Pellegrin – UDT2SV - Bordeaux

La révision de la classification internationale des maladies a ouvert une porte pour la meilleure appréhension des pathologies du sommeil. Un groupe a été constitué au sein de l'académie Américaine de Médecine du Sommeil dans le but de proposer une évolution des codages associés aux pathologies du sommeil aussi bien pour la classification actuellement en cours ICD 9 que pour la future ICD 10. Cette proposition a été élaborée notamment sous la supervision de **Peter Hauri et Bart Sangal, Sam Fleishman, Marc Raphaelson.**

Cette proposition (qui est encore susceptible d'adaptations) sera présentée à l'occasion de la réunion du NCHS qui se tiendra à Baltimore (USA) le 5 Décembre prochain. Les diagnostics listés devraient faire l'objet d'une intégration dans les révisions ICD9 et 10 de la classification internationale des maladies.

La traduction des diagnostic listés devra par la suite faire l'objet d'une discussion de façon à proposer les termes les plus appropriés (p.ex traduction de sleep related au moyen du suffixe « morphéique » ou du préfixe « hypo »).
